

- Instant access to thousands of technical topics written by a host of industry experts, including Steven Feuerstein, author of *Oracle PL/SQL Programming* and *Oracle PL/SQL Best Practices*, helps you develop better applications faster.
- Keyboard sensitive “Fast Track” searching lets you drill-down immediately to your issue.
- Instant Messages for Oracle provides easy access to over 25,000 error messages across multiple versions of Oracle.
- Comprehensive code library provides over 1,000 production-ready procedures and functions that plug directly into your applications.
- You can attach your own notes, docs and even Web sites to any topic.

Knowledge Xpert™ for PL/SQL

Comprehensive Technical Expertise for Oracle PL/SQL Development

In today's business climate, the need to develop and deploy high-quality database applications has never been greater. To address this need, Quest Software provides Knowledge Xpert™ for PL/SQL, a comprehensive online technical resource that allows Oracle PL/SQL developers to create high-quality PL/SQL applications fast.

Save Hours of Development Time

Knowledge Xpert for PL/SQL gives you instant access to the technical information you need to develop better applications faster. Simply install the product on your hard drive—and type a keyword. Thousands of PL/SQL topics with examples, insights and a comprehensive code library are immediately accessible—helping you develop code faster.

Each topic is carefully formatted to give you the background insights, best practices, working examples and performance considerations that you need to make effective decisions.

Instantly Access Production-Ready Code

Knowledge Xpert for PL/SQL includes a comprehensive code library that provides over 1,000 production-ready PL/SQL procedures and functions that plug directly into your applications. Save hundreds of development hours by using the code library for exception handling, date arithmetic, string parsing and hundreds of other common uses.

Resolve Error Messages Immediately

Knowledge Xpert for PL/SQL includes a comprehensive lookup facility for Oracle error messages. Just type your error message and you will immediately get explanations, system actions and recommended programmer responses. Attach your own user notes to any error message and build a library of in-house solutions.

Extend Your Knowledge by Customizing

Make Knowledge Xpert for PL/SQL your first resource when you look for PL/SQL development answers. Click a button to add your own notes, documents, spreadsheets—even Web sites to any topic for immediate recall.

Comprehensive PL/SQL Development Resource

New and intermediate PL/SQL developers will benefit immediately from the product's ease of use, presentation of information and working examples. Senior developers will enjoy the immediate recall of reference materials and the ability to share insights with junior staff members.

About Quest Software, Inc.

Quest Software, Inc. delivers innovative products that help organizations get more performance and productivity from their applications, databases and Windows infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 18,000 customers worldwide meet higher expectations for enterprise IT. Quest Software can be found in offices around the globe and at
